

KOLOHE ANDINO

FCS II KA

UPDATE

DESIGNED IN COLLABORATION WITH KOLOHE ANDINO & RECENTLY UPDATED, THE FCS II KA FIN FEATURES A NEW LOOK WITH THE SAME GEOMETRY & PERFORMANCE.

SAME GEOMETRY, NEW LOOK

The new KA fin has a new, more mature aesthetic that ties back to his signature traction pad, yet the geometry and performance of the fin remains the same.

PERFORMANCE

Sitting in the Accelerator family, Kolohe's signature fin is suited to fast, explosive surfing in punchy waves. Considered an 'All Rounder +', this fin has a relatively neutral sweep angle, so it'll provide a balance of speed, flow & response with added control.

The best way to describe Kolohe's style of surfing is fast and explosive. He likes to push hard off the bottom and perform dynamic turns on and above the lip. The well balanced nature of the KA template facilitates this style of surfing perfectly.

"I can use my fin anywhere in the world, I get the perfect amount of drive and hold when i'm doing turns, and I can also get the tail free when I need to"

TEMPLATE

In comparison to the Accelerator template, Kolohe's fin has a longer base, a touch more rake, but has less area overall. So, while you can confidently lay into a big turn, the fin will still feel relatively loose. The sweet spot for this fin is when the waves have a little more size, up to double overhead.

CONSTRUCTION

Performance Core (PC) fins deliver a consistent feel similar to a traditional fibreglass fin, but with the advantage of reduced weight. The flex pattern extends progressively from the base through to the tip helping the surfer to maintain drive and hold through a turn. PC fins are reliable, very responsive, and can be used in a variety of different conditions.

Construction	Size
PC	S, M, L
Foil	Flat

SPECIFICATIONS

TRI SMALL

Base: 4.37" / 111mm
Depth: 4.41" / 112mm
Area: 13.85"² / 8934mm²
Sweep: 35.1°
Foil: Flat

TRI MEDIUM

Base: 4.52" / 115mm
Depth: 4.55" / 115mm
Area: 14.73"² / 9500mm²
Sweep: 35.1°
Foil: Flat

TRI LARGE

Base: 4.67" / 118.5mm
Depth: 4.70" / 119.3mm
Area: 15.84"² / 10220mm²
Sweep: 35.1°zFoil: Flat
